DADE, 1698.

THE COUNTRY-MAN'S KALENDAR,

For the Year of CHRIST, 1698.

Being the second after the LEAP-YEAR.

Containing the Daily Motion of the Sun and Moon; with the Aspects of the Planets, and their Conjunctions with the Moon; And from thence the Inclination of the Air, and Alteration of Weather, throughout the Year.

Accommodated with other Useful Things; As,

The Sun's Rising and Setting for every Day in the Year.

A Chronology of several Remarkable Things.

The Commencement of the Four Seasons, and their Nature.

The Eclipses of the Sun and Moon.

Physical Verses, and Rules for Husbandry and Gardening.

Observations and Natural Prognosticks for the Weather.

Of the Judgment of Diseases from the Urine.

And for the Benefit of Country-men.

An Account of several Diseases incident to Horses, and other Cattel, with their Causes, and the Cures of them.

Calculated for the Meridian of the Middle of

ENGLAND:

And so the more Useful for that, and the Kingdom of IRELAND also.

London, Printed for W. Onely, for the Company of Stationers, 1698.

Common Notes and Moveable Feasts, 1698.

According to the

English Account.			Foreign Account.

1	0	0	1	0	0	2	0	0	3	0	0	4	0	0	6

The Use of this Table is thus:

Example. To find the Interest of 70 *l.* for 6 Months: Find 70 *l.* in the first Column, and right against it, in the Column of 6 Months, is 2*l.* 2*s.* and so much is the Interest. For the Interest of the same Summ in 9 Months, look for the Interest in 3 Months, which is 1*l.* 1*s.* this add to the Interest for 6 months, the Summ is 3*l.* 3*s.* the Interest of 70*l.* in 9 months. Also to find the Interest of 75*l.* for 3 months: First, look the Interest of 70*l.* for 3 months, which is 1*l.* 1*s.* Likewise the Interest of 5*l.* for 3 months, is 1*s.* 6*d.* this added to 1*l.* 1*s.* maketh 1*l.* 2*s.* 6*d.* which is the Interest of 75*l.* for 3 months.

January hath xxxi Days.

New Moon the 2 day, at 7 in the morning.
First Quarter the 9 day, 21 m. after 7 in the morning.
Full Moon the 16 day, 8 m. after 9 in the morning.
Last Quarter the 24 day, 26 m. after 3 in the morning.
New Moon the 31 day, 16 m. after 9 at night.

DADE.

Prognostication:

In which you may behold the state of this Present YEAR of our LORD GOD,

1697.

CONTAINING

The Description of the Four Seasons, the *Eclipses*, the *Passions* of the *Planets*, and the *Inclination* of the *Air*.

Also *Physical Verses*, and *Short Notes* and *Rules* for *Husbandry*, for every Month throughout the Year.

With divers other *Notes* and *Rules* of Good Consequence, not formerly Published in this *PROGNOSTICATION*.

By *WILLIAM DADE*, Gent.

LONDON,
Printed by T. for the Company of STATIONERS.

Physical *VERSES* AND Rules for *HUSBANDRY*.

Of JANUARY.

IF thou be sick, and help would'st have,
The Counsel of the Learned crave:
If thou hast health, to keep thee so,
Fly Idleness as deadly Foe.

January's *Instructions for Husbandry.*

This Month set all kind of Fruit-Trees, a
Quickſets: In the New of the Moon (the w
and weather obſerved) you may ſet Peaſe
Beans, Parſnips and Oats, if the weather pro
mild, and the Moon decreaſing.

Of FEBRUARY.

Be choice of Food in any wiſe,
To keep thee warm alſo preciſe:
Beware likewiſe thou let not Blood,
Except the Learned ſay 'tis good.

Februaries *Instructions for Husbandry.*

This Month ſet Roſes, with all other ki
of Plants and Quickſets, ſowe Peaſe and Onio
as in the Month before (the weather con
der'd) you may now Garden for Sallet-her
Pot-herbs, and ſuch like.

Of MARCH.

Now Bleed, and Bath, if thou deſire,
And Purge alſo (if need require)
Ill humours do in many breed,
Provide in time before you need.

March

March's *Inſtructions.*

This Month (in the New of the *Moon*) Graft, Quick-ſets, and Vines, Cut your Hedges of Vines already growing. Alſo you may ſowe Onions, Beans, and Oats, and all manner of Garden-herbs.

Of APRIL.

Now wholſome Baths thou may'ſt frequent,
Let Blood alſo, and not repent;
Theſe are good means thee to defend,
From Griefs, the which on thee attend.

April's *Inſtructions.*

In this Month Pole your Hops, ſowe Barley and Artichokes, Bark Trees for Tanners, ſowe Hemp and Flax, ſet Cytrons, Melons and Cucumbers, and furniſh and repleniſh your Gardens with Summer Herbs.

Of MAY.

Riſe early now this Month of May,
And walk the Fields that be ſo gay;
From Surfeiting ſee thou refrain,
Or ſure it will procure thy pain.

May's *Inſtructions.*

In the beginning of this Month you may ſowe the Seeds of Summer Herbs, which could not endure the cold of the forepaſſed Months: You may yet ſowe Hemp and Flax: Weed your Hop-Gardens, and take away ſuperfluous branches, and Moſs your Gardens.

Of JUNE.

Drinks New or Sweet, Taſte not at all,
For, thereby grows no danger ſmall

And thy self such pastime take,
As may in God thee merry make.

June's *Instructions.*

In this Month (at the Full of the *M*
Gather your herbs to keep dry for
whole year, Weed your Corn Fields and G
dens. Set Rosemary and Gilliflowers,
Lettuce, Sheer Sheep, the *Moon* increasing

Of JULY.

Perfume thy House with Savours sweet,
But such as are for purpose meet;
Abroad as thou in Streets do'st go,
Defend thy self from stinks also.

July's *Instructions.*

In this Month ply your Haying, Fallow yo
Lands for Wheat, Pull up Hemp that is r
Get Rue and Wormwood to drive away Fle
and Moths. Dry Flowers in the shade, and th
Sun them a little for fear of corruption.

Of AUGUST.

As burning Heat will thee destroy,
So shivering Cold will thee annoy;
Let little sleep thee now content,
Purge not, nor Bleed, lest thou repent.

August's *Instructions.*

Reap Wheat and Rye, cut down you
Oats; Gather Garden Seeds, Sow Lettuc
and other Winter Herbs in the New of th
Moon. Use moderate Diet, forbear to slee
presently after Meat, take heed of sudde
cold after great heat.

Of SEPTEMBER.

Raw fruits (though ripe) may sickness bring,
Unripe much eat, a dangerous thing;
If now a Surfeit thou do'st take,
When others sleep thou must awake.

September's *Instructions.*

et Artichoaks, Sow Seeds for Winter s, gather Hops, Apples, and other Fruits ich are fit to be gathered) about the Full the *Moon*, the weather being dry. Cut cksets, Sow Wheat and Rye, kill Bees, make nice, Sow Parsnips and Carrets; Remove Set Slips of Flowers, Set Roses, Straw-es and Barbaries, and remove Trees y New *Moon* till *February.*

Of OCTOBER.

Warm Cloths must now provided be,
Also warm Meats are good for thee:
Have good regard thy feet be dry,
Thou shalt avoid much harm thereby.

October's *Instructions.*

emove your Plants and Trees in the New he *Moon*, and about the full of the *Moon* her such Fruit as you left ungathered the Month. Set all kind of Nuts and Acorns; cut your Rose Trees but once in two years, ou intend to have store of Roses.

Of NOVEMBER.

If Rheums do not molest thy Head,
It is not ill to sweat in Bed.
Feed on good Meats, if Stomach serve,
Else seek for that which doth preserve.

Novembers *Instructions.*

In the New of the *Moon* remove your Trees, set Crabtree-Stocks to Graft on, and the Old of the *Moon*, set Pease and Beans, Parsnips and Carrets, make Malt, kill Hogs and make Martimas-Beef.

Of DECEMBER.

Now cold December *is come in,*
The poor mans back is cloathed thin;
Then Feed and Cloath him as you may,
The Lord will it three-fold repay.

Decembers *Instructions.*

This Month and the next are best to fell great Timber in the Old of the *Moon*, to uncover the Roots of your Fruit-trees, Fallow Land for Barley, cover Herbs from cold, look well to your Cattel, take Fowl with Nets or Lime-twigs.

Other *Physical Observations.*

Good to
- Let the Sanguine Blood when the *Moon* in *Pisces*.
- Let the Cholerick Blood when the *Moon* hath her course in *Cancer* or *Pisces*.
- Let the Melancholy Blood, when the *Moon* is in *Libra*, *Aquarius*, or *Pisces*.
- Let the Phlegmatick Blood, when the *Moon* is in *Sagittarius* or *Aquarius*.
- Prepare Humours, the *Moon* in *Gemini*, *Libra* or *Aquarius*.

Good to purge with { Electuaries, Pills, Potions, } { The Moon in } { *Cancer*, *Pisces*, *Virgo*, }

To take Vomits, the *Moon* being in *Taurus*, *Virgo*, or the latter part of *Sagitarius*.

To purge the Head by Sneezing, the *Moon* being in *Cancer*, *Leo*, or *Virgo*.

To take Clisters, the *Moon* being in *Aries*, *Cancer*, or *Virgo*.

To stop Fluxes and Rheums, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.

To Bathe, when the *Moon* is in *Cancer*, *Libra*, *Aquarius*, or *Pisces*.

To cut the Hair off the Head or Beard, when the *Moon* is in *Libra*, *Sagitarius*, *Aquarius*, or *Pisces*.

---

ther brief *Observations* of *Husbandry*.

Et, sowe Seeds, and Graft, the *Moon* being in *Taurus*, *Virgo*, or *Capricorn*.

d all kind of Corn in *Cancer*.

aft in *March* at the *Moons* increase, she being in *Taurus* or *Capricorn*.

ear Sheep at the *Moons* increase.

ll hard Timber from the Full to the Change.

ll Frith, Coppice, and Fuel, at the First Quarter.

ib or Geld Cattle, the *Moon* in *Aries*, *Sagitarius*, or *Capricorn*.

ill Fat Swine for Bacon (the better to keep their Fat in boiling) about the Full Moon.

Natural Prognosticks for the Judgment of Weather.

THE foregoing Rules for the Judgment of the Weather, are such as are deduced from the Aspects of the Planets to the Moon and among themselves; These here following are such as are deduced from Philosophical Aphorisms. Therefore,

1. The resounding of the Sea upon the Shoar, and the murmur of the Winds in the Woods, when the Wind is not stirring abroad doth shew Wind to follow.

2. The obscuring of the small Stars, foreshews Tempests.

3. When Stars seem to shoot, Wind comes from that Quarter.

4. If two Rainbows appear, Rain follows: But a Rainbow appearing after Rain, signifies fair Weather.

5. If the Sky be red in the Morning, it is a sure token of Wind or Rain to follow, or both; for the Vapors which cause that Redness will soon be dissolved.

6. If the Sun or Moon look pale, look for Rain; if fair and bright, fair Weather; if red, Wind.

7. If a dark Cloud be at Sun-rising, in which the Sun is soon hid, it will dissolve it, and Rain will soon follow.

8. If a Cloud appear, and afterwards Vapors are seen to ascend up to it, it portends Rain.

9. If

9. If the Sun appear in the East, greater than it usually doth, it is a sign of Rain.

10. If a black Cloud appear in the West about Sun-setting, it will Rain that Night, or the Morning following.

11. If Mists come down from the Hills, or descend from the Sky, and settle in the Valleys, it promiseth fair and hot Weether. Also Mists ascending in the Evening from the Earth or Water, shew a hot day to follow.

12. Water-fowls (as Sea-gulls, Morewins, &c.) when they flock and flie together from the Sea towards the Shore. Also when Land Fowls (as Crows, Swallows, &c.) when they flie from the Lands to the Waters, beating the Waters with their Wings, fore-shew Rain and Wind.

13. If the Circles about the Sun be red and broken, it portends Wind; if thick and dark, Wind, Snow, or Rain; and the same of the Circles about the Moon.

14. The Trefoil Grass, against Rain, swells in the Stalk, and standeth more upright.

15. The Wincowpipe (growing in Stubble fields) if you find it open in the Morning, be sure of a fair Day to follow.

16. Aches, Hurts, and Corns, do engrieve against Rain, Snow, or Frost.

17. Worms coming out of the Earth, Moles casting up the Earth, Fleas biting more than ordinary, are evident Signs of Rain to follow.

18. Solid Bodies, as Stone and Wainscot, when they sweat, doth fore-shew Rain.

Nam-

Natural Prognosticks of Pestilential, *and Unwholsome Years.*

1. WHen there are great number of Frogs, Flies, Locusts, *&c.* For these Creatures being ingendred of Putrefaction, shew a general disposition of the Year, and constitution of the Air to putrefaction.

2. When Worms are found in Oak-Apples.

3. Great and early heats in the Spring (and chiefly in *May*) without Winds.

4. Great drought in Summer, continuing to the end of *August*, portend a Pestilentious Summer the next year.

5. The Small Pox, Purples, and Agues in the Summer, and hovering all the Winter, portend a great Pestilence the Summer following.

6. A dry *March* and a dry *May* portend a wholesome Summer, if there be a showring *April* between.

Signs of a Sound and Pure Air.

1. A Sound and Pure Air is made hot presently after the Sun-rising, and is made cold immediately after his setting.

2. That which yieldeth a pleasant smell after Rain, clear, and not evaporated, open and lightsome, and when the North-wind bloweth.

3. Where there are Easterly Winds in the Mornings.

Signs of Corrupt and Infectious Air.

1. A Corrupt and Infectious Air is made by the often blowing of the South, or South-East Winds;

Winds: or by the West, or South-West Wind in the Evening.

2. When the Air is cold long after Sun-set.
3. When the Air is long hot after Sun setting.
4. When the Air is long close, cloudy, or thick.

How to judge of Diseases by the Urine.

1. URine fat and troubled, betokens a burning Fever of choler: Or red and thick all over, with a black Circle, sheweth sickness all over the Body.
2. Urine white and thin, and little in quantity, sheweth cold in the Body.
3. Urine clear, with a black Circle, sheweth the sick Person hath the Ptisick.
4. Urine red and thin, with a bright Circle, shews a bad Stomach.
5. Urine thin, and greenish above, shews a cold Complexion: if blew in casting, 'tis the Ptisick.
6. Urine thin, if it shew black above, betokens great loss of Nature.
7. Urine thick and troubled like Horse-piss, signifies the Head-ach.
8. Urine fat in the bottom, white in the middle, and red above, shews a Quartan Fever.
9. Urine fat like Flesh, with dregs in the bottom like shadowing, shews the Dropsie by cold: But if it be wheyie above, clear in the middle, and shadowing beneath, it shews a hot Dropsie.
10. Urine with black dregs in the bottom, like gobbets of Coles, sheweth Worms.

11. Urine

11. Urine with black Contents (as moaths) in the middle, ſhews an Impoſtume.

12. Urine with Contents like ſhavings of Parchment in the bottom, ſhewing ſtopping of the Reins and Pipes of the Liver.

13. Urine black and green, with long white Contents, ſignifies the Palſie.

14. Urine that hath Grains under the Circle, ſheweth the Stomach is full of Worms, and alſo burning of the Heart.

15. Urine foul above, ſheweth heat in the Heart, Lungs, and Spleen.

16. Urine with black Contents in the bottom, ſhews Coſtiveneſs.

17. Urine that is long laſting, betokens biting in the Body, and great Rheume.

18. Urine thick, little in quantity, and high coloured, ſhews great burning in the Body.

19. Urine Frothy, clear and a little Red, ſhews pain in the right ſide.

20. Urine Frothy, ſheweth wind and pain under the left ſide.

21. Urine very Red, ſheweth an Impoſtume on the Liver.

22. Urine Red as burn'd Gold (if it be Hydropick) betokens Death.

23. Urine in a hot Feaver, one part Red, another part Black, another part Green, and the other Blue, betokens Death.

24. Urine in hot axis, black, and little in quantity, and ſtinking, betokens Death.

25. Urine all coloured as Lead, ſheweth a prolonging of Death.

26. Urine dark, and clear beneath, betokeneth Death.
27. Urine that ſhineth raw and white (if the ſkum in the bottom ſhines not) ſhews death.
28. Urine thin in ſubſtance, fleeting above like a dark Skie, betokens Death.
29. Urine dirty, ſtinking, and a dark Skie, betokens Death.
30. Urine like Water, with a dark Skie, in a Fever, ſheweth Death.
31. Urine with dregs in the bottom, mingled like Blood, ſheweth Death.
32. Urine black and thin (if the ſick do loath when he goes to the Stool, and ſpeaks overthwart, or underſtands not aright) if his ſickneſs goeth not from him, it ſignifieth Death.

A Deſcription of the Magnitudes, Motions, and Diſtances of the Seven Planets.

ARgol, a laborious and learned *Aſtronomer*, giveth this account of the Planets Motions and Diſtances, to wit:

The Sun is greater than
- *Saturn*, Nine times.
- *Jupiter*, Fourteen times.
- *Mars*, Two thouſand five hundred thirty five times.
- *Venus*, Twelve hundred and ſeventy times.
- *Mercury*, Three thouſand ſeven hundred and five times.
- The *Moon*, Ten thouſand times.
- The *Earth*, One hundred ninety ſix times.

Saturn

Saturn is greater than
- *Jupiter*, The one half.
- *Mars*, Two times.
- *Venus*, Two hundred eighty six times.
- *Mercury*, Four hundred and eighteen times.
- The *Moon*, One thousand one hundred twenty two times.
- The *Earth*, Twelve times.

Jupiter is greater than
- *Mars*, One hundred eighty two times.
- *Venus*, Eighty four times.
- *Mercury*, Two hundred sixty six times.
- The *Moon*, Seven hundred and Fourteen times.
- The *Earth*, Fourteen times.

Venus is twice as big as *Mars*, and three times as big as *Mercury*.

Mars contains *Mercury* once and an half.

The *Moon* is greater than
- *Mars*, Thirteen times.
- *Venus*, Six times.
- *Mercury*, Nineteen times.

The *Earth*	is distant from the *Firmament*	49150720
Saturn		127864480
Jupiter		35425120
Mars		47490640
The *Sun*		44720000
The *Moon*		48958080

Saturn is distant from
- *Jupiter* — 231386400
- *Mars* — 293164400
- The *Sun* — 319335200
- The *Moon* — 361711600

Miles.

Jupiter

Jupiter is distant from { *Mars* ——— 7722800 / The *Sun* ——— 9294880 / The *Moon* — 13532960 } Miles.

Mars is distant from { The *Sun* — 1572080 / The *Moon* — 6310160 } Miles.

The *Sun* is distant from the *Moon* 4238080, that is, Four Millions, Two hundred thirty eight thousand, and eighty Miles.

Hæc incredibilia videntur tantum iis, qui Mathematicis demonstrationibus non assuerunt, &c.

Of the Properties, and Natural Effects of the Seven Planets.

Saturn.

Saturn being well posited, is like a grave *Counsellor*, & a Man of authority thinking of great matters, a lover of Secrets, Diligent, Solitary, Covetous, Studious and a Zelotype—Being evil affected, he is an Abject, a Pick-thank, fearful, given to Solitarineſs, Sad, Stubborn, Ill-willy, Deceitful, Sloathful, Dull, a Lyar—By nature he hath relation to a Husbandmen, Maſons, Blacksmiths, Diggers in the Earth, Tanners, & the like.

Jupiter.

Jupiter is ſaid ſo be the greater Fortune, & of Nature is benevolent; Being well ſituate, he maketh men honeſt, prone to good duties, pious, magnanimous, vericundious, modeſt, wiſe, diligent, liberal & yet careful of their own—Being ill diſpoſed, he is more prodigal & ſtout—He ſignifies, Biſhops, Church-Governors, Lawyers, Judges, Governours of Towns and Cities, and Eccleſiaſtical Perſons.

Mars.

Mars.

Mars being well affected, is valiant, gene-
rous, hasty, given to War, fearing no danger, im-
patient of servitude, and injuries, not respect-
ing riches—But being badly seated, he is ireful
cruel, prodigal, a Tyrant, a Murtherer, and th
author of discords and seditions—He hath re-
lation to Soldiers, Surgeons, Turks, Fire-work
&c.

Sol.

He is Magnanimous, Valiant, Provident,
giver of long life, and a healthful body—H
maketh Men wise, famous, desirous of honour
having signification of Kings, Princes, Duke
Marquesses, Earls and Potentates.

Venus.

Venus being well situate, maketh men fair fa
ken, pleasant, fair, delicate in gesture, given
pleasures, sociable, merciful, *&c*—But being
affected, she is effeminate, timerous, a lover
Maids, sluggish, lustful, a Zelotype, and give
to idleness.

Mercury.

Mercury being well seated, causeth a shar
wit, maketh men studious, and capable of lea
ning—Being ill seated, he is subtile, crafty, m
licious, ad a Lyar—Of Persons, he signifie
Philosophers, Poets, Mathematicians, Scrive
ners, Merchants, and the like.

Luna.

The *Moon* maketh Men unconstant, fearf
prodigal, studious of Histories, and given to Na
vigation and Planting—She signifies Embassi
dors, Legates, Queens, Ladies, also Common
People, Fishers, Watermen, and such like.

O

Of the Four Quarters of the YEAR 1698.

Of WINTER.

Winter Quarter (after the *Astronomers* Account) began the 11th of *December*, at which time the Sun entered into *Capricorn* the last year, and continues till the Tenth of *March* this year. So that always the first part of the Astronomical Winter Quarter, is in one Politick year, and the latter end thereof is in the other.) *In* which time was the shortest day of the year, by reason of the Suns greatest declination from the Equinoctial Line.

This Season of its own disposition, is known to be cold and moist, contrary to the quality of the Summer; and, in this Quarter the inward parts of Mag are very hot, and being healthful, may receive plenty of Food, because natural heat is now comforted, and is gone inward, and there increaseth, and maketh Digestion the better.

The Sicknesses whereunto this Quarter is most inclined, are *Rheums*, *Gouts*, *Pushes*, *Sore Eyes*, *Melancholy*, *Coughs*, *Catharrs*, *Sciatica's*, *Falling-Sickness*, Diseases proceeding of *Bot-*

temness and *Corrupt Humors*, with divers kind of *Infirmities* incident among Women.

Of the SPRING.

THe Spring-time (being the most pleasant and Wholsom Season of the Four) taketh its beginning on the Tenth of *March*, when the Sun entreth into the Equinoctial point *Aries*, making the days and nights of equal length; which Quarter endeth the 20th of *June*, when the Sun entreth into *Cancer*.

This season is naturally hot and moist, and is of the Sanguine complexion, being the most temperate and healthful time of the year, and is therefore accounted the fittest time to cast diseased Bodies in, and to restore health again in those in whom formerly it hath been decayed by any kind of evacuation.

The Infirmities of this Quarter are *Melancholy*, *Madness*, the *Falling Sickness*, *Bleeding* at the *Nose*, *Hoarsness*, *Coughs*, *Itch*, *Scabs*, many *Ulcers*, and small *Apostumes*, the *Gout*, and *Pain in the Joynts*, *Pleurisies*, *Dropsies*, *Pestilent Agues*, *Shortness of Breath*, *Faintings*, *Pain in the Head*, *Eyes*, and *Stomach*, *Rotten Powers*, and other *Strange Diseases*.

Of SUMMER.

SUmmer (accounted the Third part of the Year *Astronomical*) taketh its beginning at the time of the Suns entrance into the first min. of the Solstitial Sign *Cancer*, which is the

Tenth

greatest declination from the Equinoctial to-
wards the North, and causeth the longest day
and shortest night in the year; and so Summer
holdeth on till the 12th of *September* following.

In this Quarter the Stomach cannot digest
so hard Meats as it will in the Winter sea-
son, for that natural heat is now distributed
to the exterior parts, and man is not now so
strong within as in Winter.

The Sicknesses at this time are divers, as
*burning Agues, Pleurisies, Wrenzies, Hot Apos-
thumes, Divers pains in the Head, Sundry Inflam-
mations*, and *New Infirmities*, proceeding especial-
ly of *Hot Cholerick Humours*, wherewith many
will be sore molested.

AUTUMN or HARVEST.

Autumn or *Harvest* (being the Fourth, or
last Quarter of the Year) begins upon
the 12th of *September*, the Sun then making
his entrance into the second Equinoctial Sign
Libra, working the same effect that he did
by his entring into *Aries*, that is, making the
Days and Nights of equal length, rising at six
in the morning, and setting at six at night;
and this Quarter doth last until the Eleventh
of *December* following.

The quality of this Season is naturally cold &
dry, yet by reason of its mutability, 'tis the most
wholesome; by means whereof, it is more
subject to sickness than any other: for the drogs
of all diseases, of the former parts of the year,
will now break forth and be seen.

The Diseases of this Quarter are like to be many and dangerous, as *Black Jaundices, Megrims, the Falling-Sickness, Oppilations in the Spleen, Difficulty of Breathing, Convulsion Fits, Dropsies, Sciatica's, Biles, Tooth-ach*, and many more: *From which good Lord deliver us.*

Of the ECLIPSES *this* YEAR 1698.

THere will be no Eclipses visible in *England* this Year 1698.

Of several Malladies, Diseases, and other Distempers incident to Horses and other Cattle, with their Causes and Cures.

I. For a Surfeit in a Horse.

TAke Three Quarts of Strong Beer, One handful of Wormwood, One handful of Celendine, and One handful of Herbgrace; chop them and boyle them in the Beer, until two parts of three be boyled away: Then squeeze and strain the Liquor from the Herbs, and put therein a Spoonful of Honey, and Two Ounces of Treacle, with a lump of sweet Butter. — Give it him fasting in the morning, with Exercise after it; and when you bring him

him home, cloth and litter him up warm: And two or three hours after give him a warm Marsh, and white Water.

II. For the Gravelling of a Horse in the Foot.

Cut the Hoof till you can find the sore: Then take One Ounce of Virgins Wax, a quarter of an Ounce of Rozin, and a quarter of an Ounce of Deer-suet; half an Ounce of Boors Grease, and One Head of Sengreen: Bruise all these together in a Mortar, and then set it over the Fire till it be melted: Then apply it to the Foot grieved, and spare not to Travel him, for it will Cure him the better.

III. To Cure Scabs on Beasts.

Take the Beasts own Water, Butter, Salt, White-wine Vinegar, Sallad Oyle, and a little Brimstone: Blend all these together, and rub the same on the Scabby place, and it will perfectly heal it.

IV. A Bathe very good for broken Bones.

Take One Gallon of standing Lye, Two handfuls of Knot-Grass, Two handfuls of Plantine, One handful of Cumfery, and One handful of Wormwood: Boyle all these very well in the Lye; and whilst it is warm Bathe the Member afflicted therewith; and give him also, at the same time Buds of Elder gathered in *March*, and boyle them in Running Water, and give it him for several Mornings together in half a horn full of Sallad Oyle and Vinegar, and it will much prevail in knitting of the Bones.

V. How

The First day of *April* open a Vein in the Neck, and if the Blood be good, take the less, but if it be bad take the more; and from that day until the first day of *May*, give him this which I shall prescribe, and let him have it Morning and Evening, during the whole Month of *April* (which is before his turning out to Grass) which shall be much about the middle of *May*, and let him have the same the whole Month of *October*, like as you should do in *April*, after you have taken him from Grass about *Bartholomew-tide*.

That which I shall prescribe, is this:

Take a Bushel of Old Rye, sweet and clean from all filth, and put it in a clean Iron Pot dry without Water; put it over the fire, and keep the Rye continually stirring to the bottom until it be parched, that it become black, hard, and dry. Then take it from the Fire, and put it into some clean Vessel, and when it is cold, keep it stopped close for your use.

When you use it, Take two or three handfuls of it, and beat it into fine Powder, and mingle it among his Provender at every Watering, Morning and Evening, or at other times when you give him Oats. Do this the two Months of *April* and *October*; for in these two Months the Blood runneth and alters as we alter his Diet; from hard and dry Meat to Grass, and so likewise from Grass to dry Meat.

For

the Rye thus purified, dried and powdered, doth purify the Blood and cool the Liver, and purgeth the Spleen; so that the whole Body is thereby better cured and freed from all such bad and unnatural humours, which would otherwise make the Body incline to sundry Diseases, which this Rye will prevent.

VI. To Cure a new Wound or Hurt.

Take a quarter of a pound of the Powder of Bole-armonick, and put it into White-wine Vinegar, and boyle it well upon the Fire with a piece of Butter put into it: And when it comes off the Fire (before it be cold) wash the Wound once every day, and it will soon be well.

Otherwise.

To heal a Gangreen or Wound: Take Lint-seed Oyle, and put into it, it being clean washed, and washed first with Butter and Vinegar —— Also, Traine Oyle, and the Powder of Verdigreese mixed together, will heal and skin any Wound quickly.

VII. For the Staggers and Tillows in a Horse.

Give him a handful of bruised Hemp Seed in a Pint of White-wine, but first let him Blood, and then Ride him till he be warm, and presently set him up, giving him a warm Mash.

VIII. For the Blagne in the Guts.

First, Let him blood in the Mouth: Then take of a Horses Skull dried to Powder, half an Ounce, a handful of Bay Salt, and a handful of Rue dried to Powder, and brew them together in three Pints of Ale; make it blood warm, and drench the Horse therewith, and it will Cure him.

IX. For the Scratches.

Beat Green Copperas, and mix it with black Soap —— Or, take Barrows Grease and Brimstone with Butter mixed together, and apply it as hot as you can without Scalding.

X. For a Sprain in the Postern Joynt.

Take a Quart of Brine, and boyle it till the Skum rise then strain it, and put thereinto a handful of Tansie, a hand-

ful

Sheeps Suet; boyle them till the Herbs be well sodden: Then apply it very hot to the place grieved, and bind a Cloth over it.

XI. A Receipt for Ointment.

Take common Honey, and Verdigreese finely powdered, of each as much as will suffice, boyle them together till they are red: This will heal up any old or green Wound in a short time.

Another.

Take Turpentine, black Soap, Hogs Grease, Green-Wax and Pitch, a like quantity, mix them all together, and apply it warm, either Plaister-wise or Tent-wise.

XII. A Medicine to kill the Maingie in a Horse.

Take a pound of black Soap, a Pottle of Mustard, four pennyworth of Brimstone in fine Powder, Three pennyworth of Quick Silver well killed with fresh Grease, Two pennyworth of Verdigreese, a quarter of a pint of Grease; stir all these together in an Earthen Vessel, till the Grease and other things be molten, with Canvas, and without Fire, and therewith anoint the Maingie Sore; but first let him blood: Then after two days, wash it with the Water that young *Broom* or Arsmanick Herb hath been boyled in, and small chopped and mixed with the powder of Soot, and let these seeth well together, and this will help him with once anointing, and twice washing.

FINIS.

ADVERTISEMENT.

Bateman's true Spirit of *Scurvey-grass*, Plain and Golden, so long famous for the cure of the *Scurvey*, *Gout*, *Dropsie*, and several other Chronical Diseases, are still prepared by *John Hooker*, at his House in *Paul's-Chain* near *Doctors-Commons*, price 1 *s.* the Bottle.

Also the *Grand Balsamick Pills* prepared chiefly for the Distempers of the Head and Stomach, made and sold by *John Hooker* in *Paul's Chain*, price 1 *s.* the Box.
